Re: Asphalt in a Bag

26<sup>th</sup> July, 2010

This product has been used for re-instatements with extremely successful results.

The Albany Distribution division of Electrix recently won the Vector Reactive, Maintenance and Connections contract and used this opportunity to test the market for various products, one of which was pre-mix bituminous mixture. We chose to stay with Asphalt in a Bag as they deliver on time, are quick to respond to queries, have robust packaging that withstands the handling in the field that competitive products could not, and the price is competitive compared to their competition.

We have been satisfied with the product and the company and recommend them.

Your sincerely
